March 31, 2003

We raise buffalo, beef and goats on our certified organic ranch. We think the statements Grass Fed Range Free should be 100% on grass or grass hay. The people that want to feed grain, even 1%, should market their animals as grain fed. Because of the health benefits of grass, please keep the rule 100% grass or grass hay. Big feed lots must feel the health benefits of 100% grass fed is better or they would not be so worried about grass fed.

Sincerely,

David Hutchinson
